**welcome to
the backyard...**

...and welcome to Rochester Concrete Products. We are the preferred manufacturer and distributor of distinctive hardscape materials and supplies.

Since 1914, Rochester Concrete Products™ and its sister companies have been refining the art and science of interlocking concrete products. Rochester Concrete Products is recognized throughout North America for creating landscape products rich in texture, full of character and manufactured with the highest quality at an affordable price. For these reasons, Rochester Concrete Products is the professional's first choice.

There are many landscape materials in the marketplace to choose from, and only Rochester Concrete Products delivers the peace of mind you can trust.

Our products are rare because they combine beauty, durability and affordability. Rochester Concrete Products manufactures and distributes world leading brands: Necessories Outdoor Living Kits, Silver Creek Stoneworks, Rockwood Retaining Walls, Interlock Concrete Products, Rosetta Wall Systems, Keystone Retaining Wall Systems, Recon Retaining Walls and Alliance Gator polymeric sands, sealers and cleaners and many more landscape accessories and components.

Whether you're looking for an outdoor space complete with fireplace and dining table or a retaining wall to expand and support a backyard, this comprehensive catalog is a design gallery. There aren't enough pages to tell our entire story, so we invite you to visit www.rochesterpcp.com or scan the QR code to view more inspirational and award winning landscapes.

planning guide

The endless combinations of products available can make the selection process challenging. To simplify the task, follow these four design considerations when choosing materials for your backyard design.

1. Style – Style includes the shape, size and surface detail of a paver, slab, tile or wall. Choose a style that best suits the application and complements your surrounding architecture and expresses your personal flair.

2. Color – Whether you prefer a solid color, a blend or a combination of styles, shapes and colors, find one that complements or contrasts your roofing, siding or stonework. Also consider what furniture and decor, plantings and sealers will do to create the colors you'll always appreciate.

3. Pattern – Start by finding examples of landscapes and patterns you like, and share them with your landscape professional. An experienced pro can help you with your design process, budget, product selection, construction and maintenance.

4. Detail – Nothing completes a hardscape area like adding beautiful accents of inlays, caps/tops and borders. Use combinations of contrasting styles, color or patterning to create lasting flair for your outdoor living space.

Before planning your landscape project, check with your local zoning commission for building restrictions and required construction permits. Always call 811 before you dig.

Use this simple guide to help you and your landscape professional create an attractive and comfortable landscape you will enjoy everyday.

The real benefits of landscaping

Curb appeal – it's the best way to make a good first impression. Most homeowners agree, spending over \$45 billion on professional lawn and landscape services annually. Gardening has become America's #1 pastime, with over 80% of all households participating.

What does this mean to you?

A well designed landscape does more than bring increased value to your home, it brings energy savings as well. More importantly, quality landscaping brings you endless days of enjoyment.

So follow the number one trend in the country and bring the indoors out by adding a raised patio, fire pit or an outdoor kitchen. Regardless of what you do, the enjoyment of the outdoors will reduce your stress and add real value to your home.

Just follow these five simple planning steps:

- 1) Do your homework
- 2) Make a list
- 3) Make a budget
- 4) Sketch your design
- 5) Hire a qualified landscape contractor

1) Do your homework

Visit our website, Facebook or Instagram pages to see backyard patio plans, photos, ideas and MORE! The more ideas you have of hardscape materials, plants, accents and furniture – the better

2) Make a list

Make a list of things you like and dislike. If mowing the lawn or weeding a flower garden isn't for you, make note of it. Do you prefer rocks vs. mulch? Do you love flowers, but dread replanting every year? Highlight your interests below and share them with your landscape pro.

	Like	Dislike	Maybe
Modern	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Natural	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Relaxation / Quiet	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Maintenance-free	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Entertaining / Active	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Matches Homes Architecture	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Open and Spacious	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Privacy and Shade	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Eco-friendly / Energy Saving	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Outdoor Kitchen	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Outdoor Living Room	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Accent Lighting	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Fire Pit	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Fireplace	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Flower Garden	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Water Feature / Pond	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Paver Patio	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Walkways	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Sound System	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

3) Make a budget

When budgeting, plan to invest about 7-10% of your home's value. A more elaborate backyard sanctuary may require 15 to 20%. Much of what you will spend depends on how long you plan to stay in your home. If you plan to stay for more than ten years, 15 to 20% will give you the enjoyment you desire for years to come.

$$\text{Homes Value } \$ \text{ _____ } \times \text{ _____ } \% \\ = \text{ _____ } \text{ (Your landscaping budget)}$$

4) Sketch your design

Take out a pencil and paper and start at the beginning. Sketching will help you discover your likes and dislikes and make your landscaping process much easier.

5) Hire a qualified landscape contractor

If you're not quite the weekend warrior to tackle your own landscape construction, start talking to the professionals. Landscape pros are invaluable assets for their design expertise, product knowledge and construction methods.

When it's time to choose products, be sure you ask your landscaping professional

There are countless pavers, slabs and landscape tiles to choose from, the same goes for retaining wall blocks. Knowing what products are best suited for a particular landscape application is crucial. For example, pavers designed for heavy vehicle traffic are not good choices for small patios or walkways. And with retaining walls, a heavy-duty wall system probably isn't the right product for use as a small garden wall.

There's no better way to select material than to see and touch the real thing

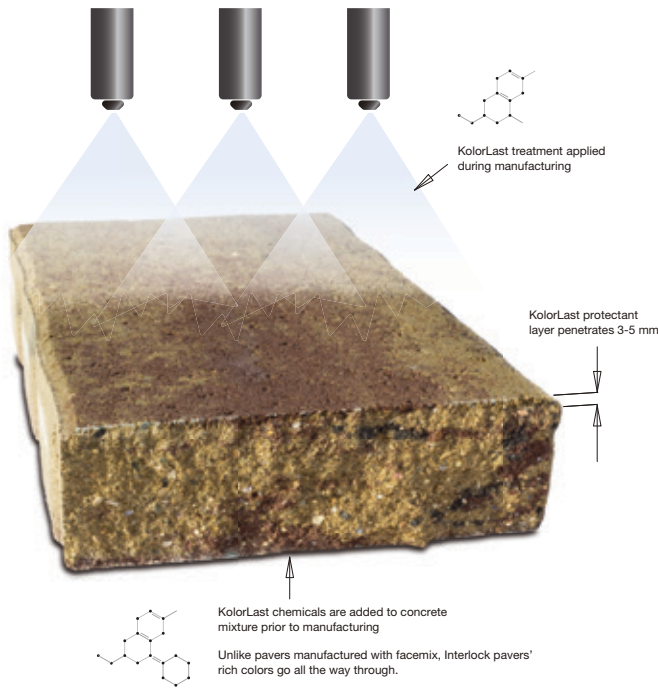

Visit a Rochester Concrete Products distributor/dealer to touch and see actual samples in the colors you like. If you can't visit a dealer showroom where outdoor living products are displayed, ask your landscape contractor to get samples gathered for your consideration. Always refer to actual product samples when making color selection.

Our products have to live up to the damaging effects of time, Mother Nature and decades of use and abuse.

KolorLast is serious protection

Concrete treated with KolorLast is highly resistant to the harmful effects of salt, chemical and acid rain exposure. Another KolorLast benefit is it's much easier to remove liquid/food spills and rust marks—minimizing or preventing stains altogether.

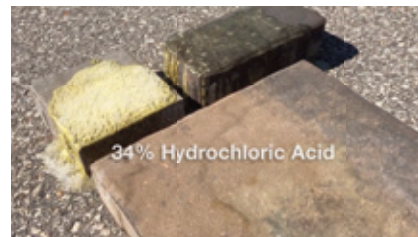

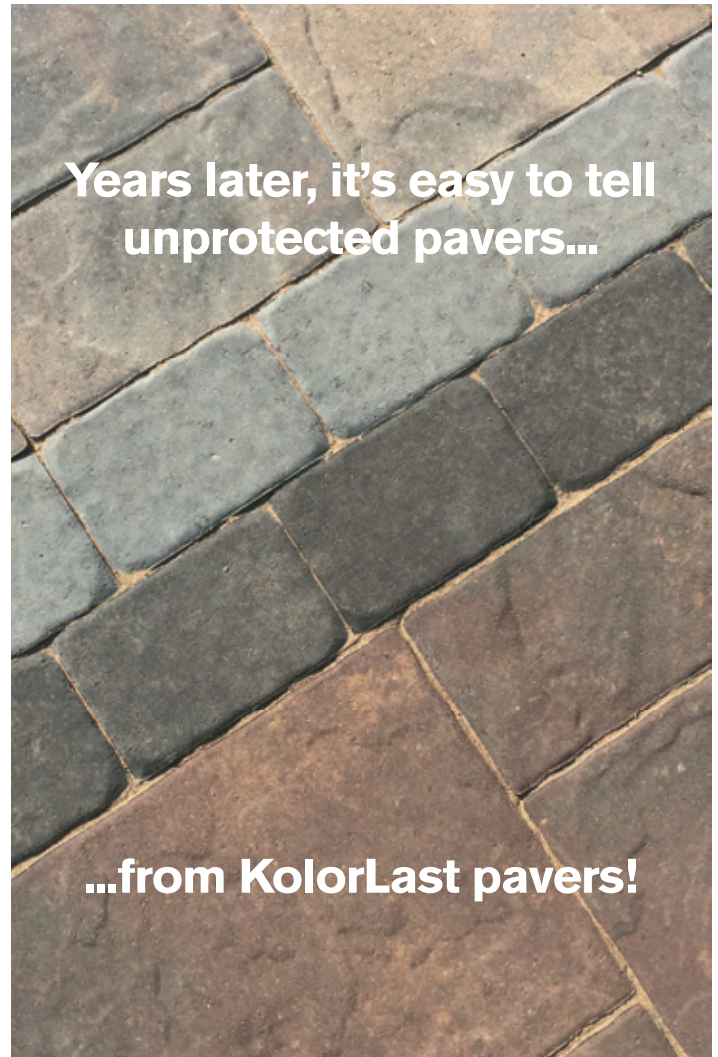

What is KolorLast?

The KolorLast manufacturing process is a simple chemical reaction between two compounds. First, a special mixture of cement, aggregates, water and a proprietary chemical additive are mixed into dry-mix concrete that is pressed into molds with extreme heat and pressure. Second, as pavers are demolded, a proprietary water-based solution is sprayed on the surface where a chemical/molecular reaction creates the KolorLast protective layer. This new protective compound penetrates into the surface of the paver – three to five millimeters deep. It can only be removed with heavy abrasion/wear.

KolorLast Protected pavers:

- Resist color fading indefinitely
- Resist effects of salt and acid rain
- Makes removing stains easier

Watch the acid test video

34% hydrochloric acid is poured on an untreated paver, and two KolorLast treated pavers—one six months old, the other four years old. After 30 seconds, the acid had little effect on the KolorLast treated pavers, while the untreated sample is visibly damaged.

www.rochesterpc.com/KolorLast

KolorLast protected pavers are available only at Rochester Concrete Products.

A large outdoor swimming pool with a stone patio, lounge chairs, and a lake in the background. The pool is surrounded by a stone patio made of light-colored, rectangular tiles. There are several lounge chairs on the patio. In the background, there is a lake with a boat and some trees. The sky is blue with some clouds.

slate

Slate's rich texture comes from actual stone quarried in the Northeastern U.S.A., where stone craftsmanship dates back to the early 1800's. Like natural slate, no two are exactly the same.

Affordable luxury

Necessaries kits are both beautiful and functional, turning backyards into attractive and enjoyable outdoor living spaces. Also, Necessaries come ready-to-assemble with everything needed to build, making them easier to install and more affordable than typical masonry structures.

Easy to build

Each Necessaries Outdoor Living Kit comes complete with everything you need to build, including pre-cut block sized to fit, reinforcements, adhesive, and easy-to-read, step-by-step instructions. Most kits can be built by two people in an afternoon, or less.

necessaries outdoor living kits

Necessaries is a collection of affordable, ready-to-assemble outdoor fireplaces, island bars and grills, kitchens, tables, waterfalls, fire rings, seat walls and pillars kits.

<p><small>No cutting, no guessing, no hassles – no problem®</small></p> <p><i>necessaries</i>™</p> <p>kits for outdoor living</p>	<p>ROCKWOOD RETAINING WALLS <i>A better way.™</i></p>
---	--

Expand anytime

You can build your project all at once or add new features over time. Because of Necessaries' modularity, expanding your outdoor living space is easy to do whenever you are ready.

Earthy colors

Necessaries kits feature Rockwood Retaining Walls' multi-piece, tumbled Lakeland and Riverland wall systems and are available in Beechwood, Bluestone, Desert, and Santa Fe colors. Necessaries mantels, tops and caps are cast from Indiana limestone originals and have smooth, honed surfaces with hand-chiseled edges.

Outdoor Living Kits are not suitable for commercial installations or applications.

necessaries kitchen kits

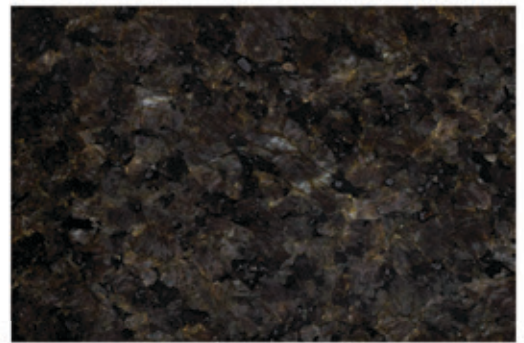

are a collection of granite-topped cabinets for backyard baking, grilling, dining and entertaining. Elegant, functional and affordable, these quality components and cabinets are ready to assemble in any configuration you can imagine.

Kitchen cabinet kits with solid granite tops

Granite is an igneous rock formed billions of years ago when magma cooled deep beneath the earth's crust. Nearly as durable as diamond, granite owes its density and hardness to its origins – solidified under extreme pressure deep within the earth. Granite is as durable as it is beautiful; it's not affected by extremes in temperature and under normal conditions, resists etching by knives, household acids and kitchenware.

Besides its beauty, granite is...

- Sanitary – when sealed, granite does not harbor bacteria
- Highly resistant to burning or charring from hot pans, appliances, utensils etc.
- 100% natural and non-toxic
- Easily cleaned

Black Pearl granite

Viscon White granite

Premium grills, ovens and kitchen components

The Kitchen features Summerset Professional Grills and stainless steel components. Their commitment to quality is reflected in the craftsmanship of their products that are backed by the strongest warranty in the industry.

Made with crazy-good stainless steel

The Kitchen grills and cabinet components are subject to constant use, and the damaging effects of time and Mother Nature. For these reasons, Kitchen grills and components use high-grade stainless steel for reliability and durability. These professional series grills are designed and built with performance, ease of use and total customer satisfaction in mind. With proper care and maintenance, they can last indefinitely.

The real strength comes from #443 stainless steel. Grade #443 stainless steel is an alloy high in titanium and chromium (making it magnetic), yet very low in carbon. High quality stainless steel was formally perceived as non-magnetic, but since the origin of #443 that is no longer true. Compared to other grades of stainless steel, #443 expands less when heated - meaning less stress, warping and corrosion - making it the choice for use throughout the Summerset Professional Grill Series.

Grade #304 is one of the most widely used grades of stainless steel. Its durability and beauty make it the preferred grade in the market. #304 is a non-magnetic alloy high in chromium and nickel with some carbon. It is used in the drawers, doors and sinks, along with the cooking grids and racks, because it will last like no other.

There are stainless steels you won't find in any of our products

Grades #201 and #202 stainless steel are comprised of nickel with magnesium or nitrogen. These alloys were created to reduce costs; they are not magnetic, nor stand up to the elements as well as grades #304 or #443. Commonly used in grills and appliances of lesser quality, #201 and #202 are more likely to experience corrosion when subject to high temperatures.

Backed by some serious warranties

Grills: Limited lifetime warranty on construction and manufacturer defects. Limited lifetime warranty on frame and housing. Limited lifetime warranty on cooking grates, burners and valves. One year warranty on all other parts, components, and electrical.

Components: Limited lifetime warranty on construction, workmanship and materials for all stainless steel components, including doors, drawers, ice chests, beverage centers, sinks and grill liners.

Granite/Concrete: All Kitchen cabinets come with a limited lifetime warranty on the granite and concrete against material defect.

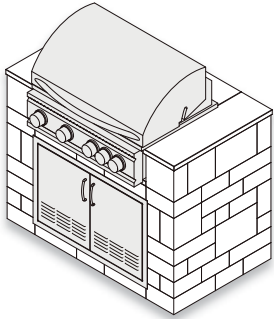

Note: Summerset warranty does not cover commercial or rental applications. It does not cover discoloration, surface rust, corrosion, or oxidation, which may occur due to harsh environments, chemicals or overheating. Warranty does not cover damage resulting from improper installation, abuse, alterations, misuse, or improper care. All warranties are subject to manufacturer review. Warranty covers replacement parts only. It does not cover labor or labor related charges. Registration form for appliances must be submitted within 30 days of purchase date to validate the above warranty. For complete warranties, visit us online at www.outdoorlivingkits.com
